THE BEST COFFEE ON EARTH

Legion Social Evening Monday, April 2nd.

A social evening will be held in the Masonic Hall on Monday 2nd. April at 8 p.m.

Lt. Col. N. Dingle, O.C. Calgary Highlanders, will give an address on the 10th Bn. C.E.F. This famous unit was first commanded by Lt. Col. R. L. Boyle of Crossfield and among its compliment were many from this district.

All members of the Legion and all Returned Soldiers of any of the forces with their good ladies are cordially invited.

An invitation has been extended to the members of the Board of Trade and their ladies.

A good programme has been arranged.

Lunch will be served by the Junior Guild members. 25c

"Auntie" Adderley Celebrates 75th. Birthday

Mrs. Adderley held her 75th. birthday last Thursday. A number of her lady friends along with some of the members of the Anglican Guild met at her residence and enjoyed a pleasant hour over the tea cups. During tea time, Mrs. Currie, Vice-President of the Guild, presented Auntie (as she is familiarly known) with a cheque. The Rector Rev. A. D. Currie was also present. After tea a game of "find the cof-fee-pot" was played.

The whole district wishes Auntie many more years amongst us.

Canadian Cowboys Still Winning

Canadian cowboys are still riding to new successes in United States rodeos and stampedes. At Fort Worth, Texas show held recently, George McIntosh of High River, one of Canada's greatest bareback bucking horse riders, turned in a performance on Sundown that brought the crowd to its feet with a roar. Pete Knight of Crossfield, world's champion horse rider, also turned in a great performance. Exchange.

Robt. English, Deputy Minister of Municipal Affairs, Resigns

Robert English, Deputy Minister of Municipal Affairs, has resigned, according to an announcement by Hon. R. G. Reid, Provincial Treasurer. Mr. English's resignation was conveyed in a letter which was placed before the cabinet and after due consideration, accepted.

School Fair Concert a Success

The concert given in the U. F. A. Hall on Friday last, under the auspices of the School Fair Association was largely attended and an excellent program given by pupils of the different schools of the Association. President Garnet O'Neill occupied the chair.

Harry May, Secretary of the School Fair, states that the tidy sum of \$30.00 was realized from the concert after paying expenses.

Curling Season Too Short

The curling season at Carstairs and Didsbury seems to be considerably longer than in Crossfield. For the past few years we have opened the rink later than rinks in adjacent towns and finished up a whole lot earlier.

The point is that local curlers do not get enough curling to put them in their best form, this showed up very distinctly in the annual bonspiel.

Needless Worry

There seems to be some uncalled for worry among some of the townspeople, to where the Chautauqua money is to go. When you look around town and note the many improvements the Board of Trade have made during the past few years, and there is still much to do, I don't believe there is any cause to worry over the surplus from the Chautauqua. Better cheer up and do a little boasting.

Chautauqua tickets are going like hot cakes, better get yours today.

Chautauqua Gleams

Another week has come around and here's your Chautauqua Reporter once again on the spot. As promised I have printed for you a resume of the two plays, and here they are:

Friday, "A LADY TO SEE YOU!" First had the leading man only recited the wise words of the poet "Oh what a tangled web we weave, when first we practice to deceive!" then there would have been no play, for well to give it to you in the publisher's own words--"To dazzle, to delight, and whilst its audience into a world of frivolity comedy, is the only aim of this extraordinary farce. Gerald Donovan, a young lawyer, earns money on the side by writing for the 'Chautauqua' magazines. To get his place to compete under a pen name with a number of lessers, he uses the same name he has secured from a matrimonial exchange. All might have been well had his very suspicious mother-in-law started investigating, and had not the original owner of the pen name turned up.

At the same time as the original of the pen name turns up, together with his temperamental young wife Mimi, so does Donovan's wife, with a detective and, heaven--defend him--two of the love sick ladies! Donovan gets his plots all right--but he's not writing them now, he's living them! The situation is made no easier by the jealous Mimi who jumps at the first opportunity to suspect others are in love with her husband! It's a cyclone of hilarity, a gay play, a swift moving laughable farce, it's a sure cure for the blues. See it, see all your favorites: Seville, Gordon, Metheral, McClelland, Cruckshanks, Stevens, Dickson, Williams, Whilans, and Currie, strut their stuff, and they assure you that you won't be disappointed.

Now the play for Saturday, "THE HEART CRY." This is another type of play altogether, it's drama mingled with comedy. Mother's if your boy was reported missing in the war, and some twenty years later a man turns up claiming to be your son, can prove everything that happened when he was young looks like you, boy, would you know positively that he was really your boy? See how Ma Lynd skilfully and lovingly unsets a similar jungle.

Girls if your sweetheart had the same thing happen to him as mentioned above, come back twenty years later, told you all the things you had done together years before, looked like your fiance did, could you believe whether or not he was an impostor or not? Read the article? Come and see how Bob Armstrong led the situation that confronted her. The unusual prologue in the "Heart Cry," is but the forerunner of a plot that would please any type of audience.

Red Kingdon, returned home from the war, finds family, position and everything gone, and through force of circumstances, becomes a cleric. His startling resemblance to Bob Lynd and his "stepping into the shoes" of the latter in his home, form the basis of the story.

Another gang of favorites are in this cast, set them, and don't forget Peter, the dog, and the two rascals of the Chautauqua. Here they are: Stevens, Collicutt, Young, Fitzpatrick, Fleming, Baker, and Spivey.

Now just before we call it a "30," a news flash from the Ticket Queen, will all patrons please arrange to claim, and pay for all seats reserved, on or before April 6th, as seats not claimed after this date, will be sold.

From the Stage Squad, patrons are respectfully requested to refrain from smoking during the performance, whilst annoying to your neighbors this is also contrary to the rules of the theatre, and we beseech each and everyone co-operation.

Curlers Play Friendly Games at Carstairs

Curlers Play Friendly Games at Carstairs

at Carstairs

A rink of local curlers, skipped by D. W. Carmichael, visited Carstairs on Monday evening and broke even in the two games played, defeating the Carstairs rink of grain buyers skipped by W. S. Shantz, by a score of 7-6, and going down to that old sharpshooter, Charlie Bislop, by a score of 15-5. Crossfield--D. W. Carmichael, Tom Mair, Carl Becker, Norm. Johnson, Gordon Purvis gathered up a rink and went to Carstairs on Tuesday evening, and won both games played, defeating Gee Foster by a score of 12-7, and taking Mr. McClelland into camp by a score of 11-6. The rink--G. Purvis, R. J. Hendry, Chas. Fox, Ed. Fox, Mr. Hendry skipped the second game.

Gone, But Not Forgotten

"Bull" Hinkle who farmed the Hall place last year has left for Youngstown. Everybody should be well satisfied even though he for good to make some of his promises good before leaving.

Notice

In the interest of all our customers, we have decided that commencing Monday, April 2nd. this business will be conducted on a strictly cash basis; absolutely NO CREDIT will be given.

An Exhibition Of Childhood

London is to witness a most unique exhibition when, on April 19, will open a display of relics of "Children throughout the Ages", acclaimed as the most comprehensive portrayal of child life down the centuries ever presented to the public. The event derives significance as much from the historic value of the various exhibits, as from the purpose to which the proceeds are to be devoted. The beneficiary will be one of London's most deserving charities.

The relics to be displayed link child life with the dim remote ages of the past, the oldest exhibit being a Chinese doll said to date from 600 B.C. From that far distance down the years, the varying fancies of children, the toys which brought them pleasure, the garments they wore, the furniture which decked their nurseries and playrooms, all will be traceable in the array of exhibits from the pre-Christian era down to the end of the reign of Queen Victoria.

Queen Elizabeth's christening robe, her cap and mittens, a portrait of her as a baby (by Holbein), will be on show. A shirt worn by Charles I. as a child of two, his boyhood's brocade coat, will find prominent place in the display beside Oliver Cromwell's christening robe. Here then that historic enigma which ended so tragically for the monarch is made to symbolize the transitory nature of human passions and, transformed, serves the charitable purposes of to-day. Napoleon, too, will be represented, not in a manifestation of childish desire but rather in evidence of that other love which great and lowly have in common, and which is, of course, as old as childhood is. The present given by the Emperor Napoleon to his infant son, the King of Rome, has been obtained as an exhibit.

Perambulators and cradles and such adjuncts of childhood that flourished in the seventeenth century, have been collected to augment the display. Children's furniture from the sixteenth to the nineteenth centuries will be shown, as well as a display of British and foreign children's clothes, hats, shoes and gloves of the same period, early games, cards and jigsaw puzzles, picture books and lesson books. A series of rooms is being arranged to depict child scenes of bygone days with inevitable wax figures in the Madame Tussauds tradition. There will be portrayed in similar fashion a Kate Greenaway scene, a Victorian Sunday, the ancient nursery and the modern nursery.

The British royal family, as usual where charity is the object, is accorded wholehearted support to the exhibition. Queen Mary is contributing playthings of her own childhood, and toys which enthralled the young Prince of Wales, his brothers and sisters. Two gold rattles given by Queen Victoria to the Prince of Wales also have been offered, and considerable interest will attach to an exhibit of the immature efforts of the Prince and his brother, the Duke of York, as artists. It is said these efforts are just as atrocious in result and effect as any of less exalted youth.

Perhaps one of the most interesting of the relics to be exhibited, however, has no connection whatever with the childhood of the great or the near-great. It is a pewter feeding bottle, believed to date back to about 1750. It was discovered in possession of a farmer who was using it to feed his lambs. Probably no more fitting place could be found for this momento of a bygone period and a long-forgotten childhood than alongside the relics of royal youth and palace playrooms. It is a striking reminder of that strange democracy of the very young, that constant symbol of the "great levelers"—childhood and death—and it is to be hoped that as such, in these transitional days, it will be interpreted by those privileged to patronize the exhibition.

There is a timely moral lesson, too, in the story recently told by one of the better known financial journals. It happened that a shabbily dressed, soberly poor, elderly woman entered the classic portals of a large up-town bank in New York, and told the uniformed guard she desired to open an account. She was shown to the new account department where three officers of the bank were more intent upon the approaching lunch hour than upon new business, particularly business which came in such inauspicious garb. As it happened, lunch was over, and the woman was left to the manager.

After stating her mission, the old lady asked to see a statement of the bank's financial position, much to the surprise of the manager who was accustomed to having the institution's financial status taken for granted, particularly by small depositors. However, he presented the requested statement, answered courteously some startlingly intelligent and pertinent questions, which satisfactorily received, brought the intimation the lady wished to open an account. She gave her name and other necessary information, and casually, for he expected a small initial sum, he asked: "How much do you wish to deposit?"

"Thirty-one thousand dollars," replied the old lady, equally casually, as she proceeded to count out the money in bills of various denominations.

Harry Lauder's New Mansion

Lauder Hall, Sir Harry Lauder's new mansion at Strathaven, Scotland, is receiving its finishing touches, and will be ready for occupancy in a few weeks. He had given the planning his close attention, and the building contains many historic as well as unique features.

While excavating for a new building in Kustendil, Bulgaria, workmen recently found an aqueduct in which the top-pipe sections could be removed for cleaning.

Among men the safest auto driving ages are between 20 and 30, and among women, between 20 and 40, according to statistics recently compiled in England.

Weary Days—Sleepless Nights

Wreck the Nervous System

Men and women toss night after night on sleepless beds. Their eyes do not close in the refreshing repose that comes to those whose nerves are right. They are irritable and nervous, weak and worn out, and everything looks dark and gloomy.

Milburn's H. & N. Pills is the remedy that is required to restore the balance of good health. They bring back the sound and refreshing sleep, tones up the nerves, and impart that sense of buoyancy to the spirits that is the result of renewed mental and physical vigor.

Strange Accidents At Sea

Ships' Officers Give Accounts Of Two Unusual Collisions

Recalling strange accidents at sea, officers of the steamer Beechpark, at Saint John, gave first-hand accounts of two unusual collisions.

Chief Engineer David Thomson was with the Volumina when that ship carried troops across the English Channel in war days. Traveling without lights, troop-carriers proceeded at full speed over courses ordered clear by the admiralty. A stocky trawler returning from the banks had not heard the warning and unwittingly crossed the trooper's track.

"It was the first time an iron ship was cut in two," said Thomson. "We struck the big trawler broadside, and the iron hull went right through the hull and out the other side. From the port I got a fleeting glance of the stern half sinking."

Only five of the crew of 30 were rescued, and one died soon after. The confused survivors wouldn't believe it. They couldn't understand why we had not sounded an alarm.

Capt. Will Masson told how the steamer Montpark, a famous Q-boat during the war, met a strange end while under his command in 1919. A crash occurred while the Montpark was feeling its way through poor visibility one night a few days out from the Tyne mouth. Capt. Masson saw the bow of another ship protruding into his own, heard terse orders in a foreign language, and watched the unknown vessel back away into the mist.

The Montpark sinking, its crew jumped into the sea. Capt. Masson and a few seamen were rescued from a life-raft the following evening, but other members of the crew were never found and the ship which left them helpless was never identified.

Progress For Persia

Mechanization Of Old Handicraft Industries Looks Like Mistake

And now the shah of Persia has evolved a five-year plan! Progress is to make its debut through the mechanization of the ancient handicraft industries and has created many delights for collectors. Great Persian factories will turn their looms loose when patient hands have labored after the traditions and the patterns of the centuries.

None will be the features that made oriental rug collecting a delight to those with incomes permitting it. No longer will variations in color tell of the exhaustion of some native dye mixture, or irregularities in pattern betray the advent of a new native weaver. The innovations that began with aniline dyes and chemical washes will reach their climax in a uniformity that matches the best American "orientals."

Indeed, progress in Persia may mean no progress at all. Who will want a genuine oriental rug if it differs not a whit from the mechanized product of the accident?

What Motorists Pay In Taxes

Automobiles Contribute More Than 27 Per Cent To Revenue

More than 27 per cent of the total revenues collected by the governments of the different provinces of Canada is contributed by owners of automobiles in the form of taxes on gasoline and license fees. This information is disclosed in a report just issued by the Canadian government bureau of statistics.

The report states that the total amount paid by automobile owners to the provincial treasuries in the fiscal year 1932-33 was \$45,499,458, of which 19,916,280 and \$20,551,173 was in license fees.

In the province of Ontario 35.9 per cent. of the total government revenue is paid by motorists; in Quebec, 32 per cent.; in Nova Scotia, 27.2 per cent.; in New Brunswick, 27.3 per cent.; in Alberta, 24.1 per cent.; in Saskatchewan, 22.7 per cent.; in Manitoba, 39.8 per cent.; in British Columbia, 17 per cent. and in Newfoundland, 15.45 per cent.

High Broadcasting Station

To spread Hungarian culture throughout the world and make it possible for nationals residing in other countries to keep in easy contact with the fatherland, Hungary will erect the highest radio broadcasting station in the world. It will be on an island south of Budapest. A trellis work steel tower will rise 932 feet, and a telescopic shaft on top will make the total height 1,022' feet.

Telephones in Iceland number 4,773, while those in Nigeria total 2,000 and those in Belgian Congo, 1,420.

Restricting Rubber Supply

Britain And Holland May Find Plans Upset

W. L. Clark, writing in the *Boer Clues Star*, says: "Now Great Britain and Holland controlling 65 per cent. of the world production of rubber and the United States consuming 50 per cent. of that output, conversations are being held between the British and Dutch with a view to restricting the supply."

In 1928 the British tried the Stevens restriction plan which curbed exports of rubber as well as actual production. The world price of crude rubber went up from 16 cents to \$1.60 per pound. Then the Dutch producers speeded up and ruined the British scheme. The price sagged. It is now between 9 and 10 cents per pound.

Just now the Dutch are dickering with the native producers in the Dutch East Indies. Although the natives do not contribute much to the total supply, it is sufficient to know the propensities of the British and Dutch. In the meantime the United States is asking the right to take part in the discussion as the chief rubber consumer.

The way the rubber restriction plan can be upset so simply prompts the thought that Soviet Russia could easily make any wheat agreement between the other nations look pretty sick."

Motor License Revenues

Alberta Government Does Not Favor Extending License Year To April 1st

Revenue from Alberta motor licenses amounted to \$500,000 for January and February of this year, Premier Browne stated in the legislature in showing that this is an important source of provincial receipts at the year's opening.

At the time, the premier was dealing with the government's firm opposition to acceding to the largely-signed petition from the Alberta Motor Association asking that the license year be extended to January 1 to April 1.

Formation of a moving picture censor board for the prairie provinces may be considered shortly, according to information given the legislature by Mr. Browne. Estimates for the censor board in this province were under discussion. The amount passed was \$8,900, an increase of \$20 over last year.

Gifts Exchanged

Prince George And African Chief Share Hands

Prince George and Chief Tseheki of the Bamangwato tribes, whose banishment a year ago aroused international attention, were the central figures in a cordial gathering at the king's youngest son opened his tour of Bechuanaland and Rhodesia.

The native chieftain, sent from his territories for flogging a white man and subsequently reinstated by King George, warmly assured the prince of the tribe's loyalty to the throne, and presented him with a magnificent set of skins.

The prince shook hands and in turn presented the chief with a walking stick. Subsequently Prince George shook hands with Tseheki's brother, Queen Semane, whose dramatic appeal to the king on her son's suspension brought about his reinstatement.

New Television Machine

Will Be Ready For Demonstration At Chicago Show

The world's largest television machine, being built at the Horton Steel Works, Fort Erie, N.Y., will be ready for demonstrations at the re-opening of the Century of Progress Exhibition at Chicago on May 1. The builder of the machine, U. A. Sanabria, of Chicago said his machine, which would have a 30-foot screen and its transmitter would weigh more than 5,000 pounds. It would have a definition sufficiently large to handle an entire scene at one time.

Suggestion Is Made That A Visit To Canada Should Be Undertaken

A suggestion was made in the British House of Commons that Canada be invited to send to Canada detachments or flights of the air force to "show the flag" in the Dominion. The planes would be sent aboard a naval aircraft carrier.

Discussion of the proposal during the debate on the air estimates when Oliver E. Simmonds, Duddington Conservative and aircraft manufacturer, told the house Canada had never seen a squadron of British planes, although every year squadrons of machines from the United States made exhibition flights to Canadian air pageants.

Mr. Simmonds said he was in Ottawa early this year and heard hope expressed that the Royal Air Force would "show the flag" in Canada. He asked that the air ministry consider the matter.

Sir Philip Sassoon, minister for air, described the suggestion as "very interesting."

Passenger Train Pooling

Expected To Effect Big Saving

The passenger train pooling arrangement for the Montreal-Toronto, Ottawa-Toronto and Montreal-Quebec services, as extended and effective from March 11, will produce a total saving of approximately 1,000 train miles per annum, divided about evenly between the C.N.R. and C.P.R. and on the basis of a conservative estimate will represent a saving to each company of approximately \$500,000 per annum. This information was given in the House of Commons by Hon. R. J. Manion, minister of railways and canals, based on a telegram from C. J. Fullerton, of the C.N.R. board of trustees.

Traffic in trolleys has been made illegal in Germany.

Dickens Was Good Reporter

Began Career In Press Gallery Of British Parliament

A new world Dickens which has been running serially in the newspapers is appropriate for at least two reasons. His genius first broke on the world in installments. Was there ever a time in the history of literature when a world of readers waited as impatiently as people did for the immortal monthly "parts" that began with "PICKWICK"?

The second reason is even more pertinent for newspaper men. Dickens began his career as a reporter. He worked in the press gallery of parliament from his nineteenth to his twenty-third year, until he set to work on "PICKWICK." He was one of the best parliamentary reporters of his day, with an extraordinary reputation for accuracy. He told the New York editors in one of his farewell speeches, "To the wholesome training of severe newspaper work, when I was a very young man, I constantly refer my first successes."

—New York Times.

London Consumes Less Meat

Dieting and slimming by women and the popularity of canned goods with week-end and unemployment are given as reasons London consumed 10,000 tons less of meat during 1933 than in 1932.

W. N. U. 2039

Has Plan For Laying Foundation Of New Municipalities In The West On A Village System

Noting the recent proposal of a British settlement company to locate thousands of families on unorganized land in Canada within the next few years, James H. Ramage, farmer at Creetwyl, Sask., outlines a plan for laying the foundation of new municipalities on a village system.

"Under the present arrangement municipal offices, churches, stores, schools and other social conveniences are widely scattered," Mr. Ramage pointed out. "My idea is to have a main street through the centre of every township, extending if necessary or possible throughout the length of the province."

"The advantage is in having such utilities as gas, electric, water lines, telephone systems, water works and other public services joined together in the most useful and economical 'manner,'" continued Mr. Ramage.

"The main street would do away with the necessity of further expensive railway development, since it would become an all-season transportation artery used by trucks and buses," explained Mr. Ramage. "As the farms are situated now the farmer, in most cases, is several miles from a highway of any kind, and seldom is he on a direct route to his shipping point on the railroad. The highway system is so diversified in direction and development is slow. There are too many roads and not enough good ones."

The farm houses would all face the "main street," it is pointed out. Where about 75 families occupy a settled township there could be 600 or more, Mr. Ramage thinks. Saskatchewan with 3,700 townships might support 3,000 persons per township and have a population of 11,000,000. Alberta, Manitoba and the Peace River district in the Northwest Territories could support correspondingly large populations, said Mr. Ramage.

The 23,040 acres in a township would be divided up as follows: Forestry work, 150 acres; gardens, 120 acres; buildings, 120 acres; shelter belts of trees, 1,050; farming, 21,600 acres. "This distribution would reduce the wheat acreage as suggested by Premier Bennett and others," said Mr. Ramage.

Means Hard Work

No Short Cut To Anything That Is Worth While

What is needed to-day is not new things, but true things. It is an old world. There is enough of happiness and progress in the world, just for the bringing out. It means hard work, not big talk. It is one of the old truths, the new-truths, the everlasting truths, that there are no short-cuts to things worth while. Those who foolishly imagine that they have some new way to change the world, or the part of the world they adorn, are simply selling themselves false thoughts by high-pressure hypnotism. The world continues to make progress to better things, not in new ways, or by loud mouthings, but quietly and surely through effort and thought and labor.

Going Ahead With Work

Reclamation Project Of Dutch Government Involves Huge Sum

In parliament the minister of waterways announced that the government intended to proceed with the Zuider Zee reclamation scheme, despite the great cost entailed, many million guilders.

Up to January 1, this year, 200,000,000 guilders had been spent. On the other hand, it is estimated that the reclamation will give work to 3,000 laborers for ten years, which fact alone in view of the unemployment situation, the government deems sufficient reason for its continuance.

Famous Medical Scientist

Sir Charles Sherrington, F.R.S., the celebrated scientist, whose remarkable discoveries regarding the nervous system have given him a world-wide reputation, is 74, and served with British and foreign decorations and honors. He started his professional life in St. Thomas's hospital. He is considered the most famous British medical scientist. As a scientist he writes poetry, and has published a volume of verse.

The number of hogs graded in Canada during 1933 was 5,172,966.

Interesting News Bulletin

Souvenir Of 1881 Event Printed On Tree With Charcoal

The first news bulletin in the Rocky Mountains has found its way into the hands of the "printer's" daughter, Mrs. R. A. Chowne of Vancouver, who has forwarded it to her father in England, more than 52 years after it went to press.

Printed with charcoal on a Douglas fir, the bulletin can, still be read: "July 13, 1881—Tregent cut his foot, Major nearly drowned. Both dying."

The "bulletin publisher" was A. E. Tregent, now resident of Guildford, Surrey, England. He and Tom Wilson of Banff, who cut down and preserved the bulletin in 1881, are the last two remaining members of the Canadian Pacific Railway pathfinders of 1881.

The record on the log refers to an accident which befell Tregent a few miles west of Banff and as a result of which he was left on the trail to recover from a badly lacerated foot. Major A. B. Rogers, leader of the pathfinders, in crossing Bath Creek, afterwards named for the incident, from the Bow River to the Great Divide, was swept away on his pony and only Tom Wilson's quick action saved his life.

GAY ACCESSORIES GIVE NEW ZEST TO SPRING COSTUMES

And they're easily made and at a saving. Here's a trim little ensemble idea to be thinking about in matching hat and gloves.

The pattern includes three different styles to suit your choice. It also includes the gloves, the popular all-in-one cuffed type.

The scheme as shown in "B" and "C" in ink-blue ribbed crepe is stunning.

View "A" would also be lovely in ribbed crepe, especially in bright red.

View "D" is a popular brimmed hat, excepting the becoming Paris hat, made in two-toned silk, crepe and felt. Later for summer, it is sporty in pastel silks, cotton, linen and rayon.

Style No. 895 is designed in sizes small, medium and large.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

The Hog Marketing Outlook

Highly Favorable Canadian Export Prospects

The consumption of pig products in Canada during 1932 reached the highest point in the history of the industry at 91.7 pounds per capita. This statement appears in the Agriculture Situation bulletin just issued by the department of agriculture at Ottawa, in which the following summary of the hog situation appears.

"Briefly summarizing the situation, it would appear that the hog outlook is favorable to the producer. While it is likely that there will be some temporary price decline during the present year, the trend is upward. Market supply prospects are for a moderate volume during the first half of the year, followed by a fairly substantial increase."

"July 13, 1881—Tregent cut his foot, Major nearly drowned. Both dying."

"The bulletin publisher" was A. E. Tregent, now resident of Guildford, Surrey, England. He and Tom Wilson of Banff, who cut down and preserved the bulletin in 1881, are the last two remaining members of the Canadian Pacific Railway pathfinders of 1881.

The record on the log refers to an accident which befell Tregent a few miles west of Banff and as a result of which he was left on the trail to recover from a badly lacerated foot. Major A. B. Rogers, leader of the pathfinders, in crossing Bath Creek, afterwards named for the incident, from the Bow River to the Great Divide, was swept away on his pony and only Tom Wilson's quick action saved his life.

The Sleighs Of Moscow

Sovets Are Putting Colorful Drivers Out Of Business

Soviet Russia's war on private enterprise is driving the colorful Izvostchiks, or sleigh drivers, out of business. This winter only a few are to be found in Moscow, where once they were the popular transportation guides of gay parties who took midnight rides to dances where gypsies played. The gay parties are gone and the sleigh drivers and their horses are finding themselves of old days. It is planned to replace them with municipal taxis, but so far there are only 500 cabs for the 2,500,000 residents of Moscow, and those who wish to ride must use the crowded street cars.

No Reason At All

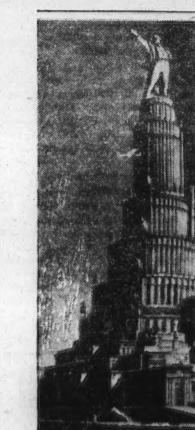

The little guests at a party were being arranged in a group for a flashlight photograph. Seeing one little fellow who appeared rather awed the photographer spoke to him kindly.

"Cheer up, Sonny," he said. "Smile at this little girl over here."

"Why should I?" he asked indignantly. "She's my sister."

"What could be more hazardous than leaping from an airplane with only a parachute to save you?" asks a writer. Leaping without one.

DESIGN FOR PALACE OF THE SOVIETS STOLEN?

Collection Has No Equal

Britain Has Specimens Of Every Living Insect On Earth

The building of a permanent home in South Kensington for one of the most precious scientific possessions of the Empire is about to be begun. The vast unrivaled Entomological Collection of the Natural History Museum is to be housed, after years of exile in alien departments, in a building six floors in height and a hundred and forty feet in length, adjoining the western ends of the present Museum block. The final plans are for at least one half of this block to be completed and confirmed, and work on the erection it may begin the new year. The collection has no equal abroad. It is an all but complete catalogue and encyclopedia of every living insect on the earth and the gaps in its completeness are filled in by year. Its specimens in their tens of thousands are stored in boxes of draught horses, as the number of registration of Clydesdales, Percherons and Belgians was almost double that of 1932. With the depletion of grade farm horses a greater demand is said in the pamphlet to be developing for young purebred stock as foundation breeding animals. With the Dominion's wide interest in the use of horses as a factor in successful agriculture in Canada, there is an increasing activity among farmers and breeders in the production of more and better horses for both farm work and breeding purposes. This situation promises a keener demand and better prices, which is bound to result in a general forward movement in the horse breeding industry.

WORLD HAPPENINGS BRIEFLY TOLD

It is possible that an open season for prairie chicken shooting may be declared all over Alberta this year.

Third reading was given in the House of Commons to a bill approving an arrangement for 99 years for joint use of railway tracks and station facilities at Quebec city by the Canadian National and Canadian Pacific railways.

The little cottage in Toronto where Mary Pickford, noted film star, was born, is to be sold as a tea room. City council has granted the application of A. Trudeau to operate a tea room there.

"Unified control" of all United States transportation, bringing motor and waterway traffic under the Interstate Commerce commission, was recommended in the report of the transportation conference of 1934.

Over 43,000 more hogs were graded in Canada during the first 10 weeks of this year than in the corresponding period of last year, namely, 657,811 in 1934; 614,087 in 1933.

J. H. Parkin of the National Research Council, Ottawa, states that a new type of aeroplane designed especially for service in mining fields had been tested at the council's laboratories and was now under construction.

Reduction of freight rates on coarse grain shipped east and west from the prairie provinces is being approximated; the export rate will be urged upon the Dominion government, if a resolution proposed by Premier Browne is passed by the Alberta legislature.

Sea serpents are not known to exist, Prof. J. R. Dymond, assistant director of the Royal Ontario Museum of Zoology, stated in a lecture at Toronto. "Those that have been reported and have been scientifically investigated," he said, "have been proved to be cases of mistaken identity."

An unnamed Chicagoan is asked to pay an income tax this year of \$1,593,633.96, indicating he made from \$4,000,000 to \$5,000,000 in 1933.

Plans for the release and return to their homes at Brilliant, B.C., of 500 Doukhobor prisoners now in Pier Island penal colony, have been completed by the British Columbia and Dominion governments.

"If you wash your face I'll give you a piece of candy," said grandmother. "And if you wash behind the ears I'll give you two pieces."

"Grandma," replied little Johnny, "maybe I'd better have a bath."

Agricultural Notes

Many Items Of Interest To The Western Farmer

An ounce of tomato seed will produce 1,500 plants; cabbage seed 1,800 plants, and celery seed 3,000 plants.

According to cold storage tests, the rate of production of eggs is apparently not related to the keeping quality of the eggs.

Storage holdings of dressed poultry in Canada on January 1 of this year amounted to 11,849,762 pounds, some 40 per cent. greater than at the same date on the previous year.

Exports of Canadian poultry and eggs have increased appreciably in the last few years, while imports of both shell and processed eggs have decreased materially.

Total milk production in Canada last year was approximately the same as for the preceding year which was estimated at 15,917,868,000 pounds.

Nearly 60 per cent. of all Canadian exports which in their original state were produced on Canadian farms went to the United Kingdom during the fiscal year ending March last year.

Farmers in French Morocco in the vicinity of Fez are authorized until the end of the close season of 1934 to destroy wild birds on their lands at any time and by any means except fire, but they must not sell or give away the carcasses.

Dairy production in most foreign countries has shown an increase during the past few years, this trend being especially noticeable in New Zealand and Australia where both butter and cheese production has shown a marked expansion.

Ontario, Quebec, and British Columbia are the provinces in which commercial production of tomatoes for canning purposes and fresh sale are of greatest importance, the total acreage being approximately 20,000 acres.—The Agricultural Situation Bulletin.

Experiments in Ireland showed that there was no appreciable difference in the keeping quality of eggs from hens confined in pens or on free range, the main factor governing the keeping quality being the season of the year. Eggs packed with the air cell up remained in good condition longer than those packed with the air cell down.

While the market for Canadian farm products in the United States is a very limited one under present tariff arrangements, nevertheless, says "The Agricultural Situation Bulletin" issued by the Dominion department of agriculture, economic conditions in that country cannot fail to have repercussions upon Canada, either direct or indirect.

The Wheat Agreement provides for an export quota of 200 million bushels for Canada during 1933-34. When the full amount of this quota is exported, Canada will have a carry-over on July 31, next, of about 164 million bushels, the equivalent of probable domestic consumption during 1934-5, and a normal carry-over on July 31, 1935. This means that every bushel of wheat produced in Canada in 1934 will be available for the world market.—The Agricultural Situation Bulletin.

Newest Dental Chair

Patient Hears Music And Forgets About Being Afraid

A dental chair which its inventor believes the patient will climb into without dread was demonstrated in connection with the Chicago Dental Society's annual convention.

Dr. Elmer S. Best of Minneapolis said its development was due to experiments which revealed to him that music had powers also to charm away that mental shrinking with which most people regard their session in dentists' chairs.

Applying his idea, he has worked on a chair which has a wire connection bringing music from a cabinet through the dental chair's headpiece to amplifiers which press against the patient's mastoid cells. The patient absorbs the music through the bones and the contrivance can be tuned so low that the music is inaudible in the room.

He said children became so completely interested in the music that frequently they have forgotten their teeth were being worked upon.

"I have heard of only one man who was not spoilt by being lionized," remarked a wit.

"And who was he?" asked the wit.

"The Prophet Daniel, sir," was the response.

"We might destroy all correspondence previous to 1906?"

"I think so—but we must take carbon copies first."

TO VIE WITH SPRINGTIME YOUTHFUL MODEL COMBINES NAVY BLUE WITH BRIGHT GREEN

Exceptionally youthful, smart and vivacious is to-day's jacket dress pattern.

The skirt and the jacket are navy blue crepe silk. The bodice of the dress that is attached to the skirt is bright green and navy crepe print.

The green and white pattern reflects the new wind-blown idea.

It is as easy as A, B, C, to fashion it.

Another scheme is light-weight tweed wool in beige with brown fleckings with the bodice of the dress of brown necchie silk with white stripes in beige.

Style No. 589 is designed in sizes 14, 16, 18 years, 36, 38 and 40 inches bust.

Size 16 requires 3 1/2 yards of 39-inch fabric with 1 1/4 yards of 39-inch contrasting.

Price of pattern 20 cents in stamp or coin (coin is preferred). Wrap can carefully.

French Cocoa Balls

3 cups cocoa

1 1/2 cups confectioners' (very fine ground) sugar

1 cup nut meats

1/2 cup sweetened condensed milk

1 tablespoon vanilla

Mix 1 1/2 cup cocoa and 1 1/2 cup confectioners' sugar. Chop nut meats and add. Moisten with sweetened condensed milk and vanilla. Shape into balls. Combine the remaining sugar and cocoa and roll the balls in it. This recipe makes three dozen.

Add orange and lemon rind to fruit juice and let stand 10 minutes; strain if desired. Cream butter; add egg yolk and salt and mix well. Add part of sugar gradually, blending after each addition. Add remaining sugar, alternately with fruit juice, until right consistency to spread. Beat after each addition until smooth. Makes enough frosting to cover tops and sides of two 9-inch layers, or top and sides of 8x8x2-inch cake (generously) and/or 3 dozen cup cakes.

Add orange and lemon rind to fruit juice and let stand 10 minutes; strain if desired. Cream butter; add egg yolk and salt and mix well. Add part of sugar gradually, blending after each addition. For the Workmanship

Three Men Can Lift Perfectly
Balanced Bridge Span

There is another example of the excellence of British bridge building in Middlesex, in the north of England. This is in line in the new town between Yorkshire and Durham. It crosses the river Tees and has to allow large ships to pass to Stockton. So the bridge span has to be 120 feet above the water level when fully raised. It is the lifting of this span that proves the workmanship, for it weighs 2,600 tons. At a test the balance proved so perfect that three men working by hand-power on ordinary hand-pulleys lifted this centre span to the top of the towers easily. Of course, the process of raising the span is to be achieved by electrical machinery, the manual labor is only an emergency measure, as a motor engine also can lift the 2,600 tons of steel.

Economic Survey Of Land

Saskatchewan To Take Inventory Of All Land Resources

Plans for the conduct of a land economic survey to accumulate facts upon which to base future agricultural development of Saskatchewan was announced by Hon. J. F. Bryant, K.C., minister of public works.

"We propose taking an inventory," he said, "of all land resources as a basis of land use, in order to indicate the crop areas and their limits, and to classify soils on the basis of their agricultural value."

Some farms which are used for purposes for which they are not physically or economically adapted, and are no longer capable of yielding a reasonable return, he said, must be classified and used for the purpose for which they are best adapted according to a carefully planned programme of land utilization.

Japanese bank notes may be withdrawn from Manchuria.

Little Journeys In Science

SNOW

(By Gordon H. Guest, M.A.)

Snow, so common in Canada, is seldom found south of 36 deg. north latitude, except in regions modified by high altitude. Snow consists of particles of frozen water which result when the air is cooled below the freezing temperature. A cluster of such crystals is called a snowflake. Hail and sleet are raindrops which have been frozen in their journey through the air, but snowflakes are produced when the vapor in the air crystallizes. A snowflake becomes larger in falling through the air because it condenses additional moisture in its descent. They are larger in mild weather than when it is very cold.

Snowflakes assume a variety of beautiful forms, and over a thousand different kinds have been observed. They are seen to the best advantage under the microscope when they are collected on a black surface. The finest forms are found in the polar regions. The most common is the hexagonal plate, and others as hexagonal prisms.

The "snow line" is the edge of the area of permanent snow, above which the ground is covered with snow all the time. The latitude regulates the altitude of the snow line, and the altitude of the snow line is the same as the mean annual temperature. The snow line in the Rocky Mountains, Lat. 43 deg. N., 12,465 feet; Norway, Lat. 70 deg. N., 3,000 feet. Generally, the snow line is a mountain range which is exposed to the prevalent wind and has a lower snow line than the opposite side. In the polar regions the snow line appears to be the same as the mean annual temperature.

Snow is a non-conductor and thus it forms a protective covering for mother earth, keeping the temperature of the ground from dropping to an extent that would damage roots and plants. The snow melting on the snowbank furnishes water for irrigating arid lands, and supplies the rivers with water. The snowflakes are simply huge masses of ice and snow. The first mention of "red snow" was made by the great explorer of the Arctic who discovered it on his high altitude trip in the Arctic regions; it is most abundant and is due to very small vegetable organisms.

It is as easy as A, B, C, to fashion it.

Another scheme is light-weight tweed wool in beige with brown fleckings with the bodice of the dress of brown necchie silk with white stripes in beige.

Style No. 589 is designed in sizes 14, 16, 18 years, 36, 38 and 40 inches bust.

Size 16 requires 3 1/2 yards of 39-inch fabric with 1 1/4 yards of 39-inch contrasting.

Recipes For This Week

(By Betty Barclay)

ORANGE BUTTER FROSTING

3 teaspoons grated orange rind

1/2 teaspoon grated lemon rind

4 tablespoons orange juice

2 tablespoons lemon juice

3 tablespoons butter

1 egg yolk, unbeaten

1/4 teaspoon salt

3 cups sifted confectioners' sugar

Add orange and lemon rind to fruit juice and let stand 10 minutes; strain if desired. Cream butter; add egg yolk and salt and mix well. Add part of sugar gradually, blending after each addition. Add remaining sugar, alternately with fruit juice, until right consistency to spread. Beat after each addition until smooth. SUNDAY SCHOOL LESSON

APRIL 1

THE RISEN CHRIST

Golden Text: "If then ye were raised together with Christ, seek the things that are above, where Christ is, seated on the right hand of God." Colossians 3:1.

Lesson: John 20:1-16.
Devotionals: Reading: Ephesians 1:15-23.

Explanation And Comments

Mary Magdalene at the Tomb of Christ, verses 1, 2. On Sunday, the first day of the week, Mary Magdalene came early; while it was still dark, to the tomb where the body of Jesus had been laid on Friday.

The stone had been rolled away from the entrance to the tomb (Mt. 28:1; Mk. 16:1; Lk. 24:10). A stone had been placed over the entrance to the tomb (Mt. 28:6) and sealed (Mt. 27:66). They found the

stone removed.

Jesus Reveals Himself to Mary Magdalene, verses 14-16. "John's want that his Lord had risen: Mary's want that her Lord first to satisfy Jesus standing. But she did not see Jesus. The Syro-Phoenician (Mt. 15:14; Mk. 16:12; Lk. 24:16-37) and John in 21:4 speak of this form as altered; Mary's eyes, moreover, were dim with tears. "Woman, why weep?" Jesus asked her.

"They were the first words of the risen Christ to her. These are indeed just as we have different—some command or rebuke to his apostles, some great declaration of victory."

It is the first word of the risen Christ to his apostles.

Jesus called Mary by name, and said, "Come here, my Master" (Ed. w. Everett Hale, Jr.).

"Touch me not," said Jesus as Mary would have grasped his feet in fear.

"The words were spoken to teach Mary that she was a

far higher way of touching Christ than with the hand of flesh: the true way to lay hold of Christ was by the grace of God" (Ed. Auguste). "For I have not yet ascended into the Father," he added. The old family fellowship was not to be renewed, only after his ascension a new and closer relationship was established between him and his followers. "But go"—you have gazed long enough at the empty tomb—"go and make known the wonderful fact that its Occupant has risen."

Gardening

Planting Shrubbery Just As Early In The Spring As Possible Is Advisable

With a few exceptions, and these are mentioned in any good guide, shrubbery, trees and ornamental vines are planted in the spring just as soon as possible. The sooner their roots are covered with soil the better even if this means simply planting them temporarily in a shallow trench. Especially when a new house where the earth is largely bare stuff thrown out of the cellar excavation, some good soil and a little fertilizer should be added and it is also important to water thoroughly for a week or two. With the larger shrubs and trees pruned severely before planting. The soil must be pruned thoroughly about the roots, and trees should be tied to a stout stake to prevent the wind working them.

A good garden will save money, improve the health of the family and provide more real pleasure than any other acre on the farm. For those who are planning to devote considerable ground to this enterprise authorities advise selecting a piece of warm, rather light soil, handy to the buildings and laying it out in 100 foot rows for horse cultivation. This is about the right length for many kinds of vegetables for the average family, but much more is required for lettuce, radish or parsnips. On the other hand those which are to be grown for winter storage, like carrots, beets, potatoes, white beans, cabbage and onions, will require several rows. Even the most unpretentious dwelling, if clothed in trees and shrubbery, fulfills the real requirements of a home. There are, too, practical advantages of such planting, especially in open places, where trees are used to break the force of storms, prevent erosion and provide shade in summer. Again flowers, shrubbery and trees, grouped about a building add distinct value to that property when the time comes to dispose of it. Rules for arranging planting are simple. The main object is to tie the dwelling to the ground, to make it appear as a natural development. Well around the outside, with possibly more emphasis at the rear, will be the larger and taller trees. These may be native sorts, like the Elm, Maple or Pine or some of the beautiful imported species such as Schwerder Maple, with its bronze-purple foliage, the Japanese Walnut, the Kentucky Coffee Tree or the striking Lombardy Poplar. Against stone, stucco, or gleaming white frame, some of the smaller evergreens like Colorado Spruce, White Cedar and the pyramidal Arborvitae are very effective. While the trees are used to break the general straight lines of the building, in this respect is worked out with the taller sorts at the corners. Shrubs range in height from 18 inches in the case of some of the Spiraea to Honeysuckle and Lilac which reach up 12 feet or more. They are used to screen, basement doors, windows, and break the straight lines about steps, corners, and walkways. They gradually lift up the vision from the wide expanse of level lawn to the higher trees in the background. Just as the shrubs are used to lead up to the trees, perennial flowers and spring bulbs are grouped in and around the clumps of shrubbery.

"I think so—but we must take carbon copies first."

WHEAT HOLDINGS NOT DIVULGED IN COMMITTEE

Ottawa.—Refusing by a vote of 88-9 to permit John I. McFarland to divulge information regarding either the extent of the government's wheat holdings or the amount in terms of cash which the treasury has at stake, the commons banking committee practically concluded its investigation into the wheat stabilization operations of the past three years.

The committee took this stand despite a clear-cut statement from Hon. E. N. Rhodes, minister of finance, that the government would place no obstacle in the way of a committee's exercise of every detail. On the two critical questions placed before the committee for consideration—whether or not Mr. McFarland should declare the extent of his operations in bushels and in money—the vote revealed nine Liberals in favour, all of them, save T. E. Donnelly, of Willow Bunch, Saskatchewan, and Hon. Ian MacKenzie, of Vancouver, from east of the Ottawa river.

But while these facts, whose suppression was considered by the committee to be vital to the success of protective measures taken in behalf of western farmers, remained unanswered, the committee did obtain from Mr. McFarland a clear statement of the character of the operations he has carried out since assuming the general management of the central selling agency of the wheat pools on November 30, 1930.

On the eve of departing for the Rome grain conference, Mr. McFarland said he had hopes a plan would be evolved to place world supply and demand on a parter, elevating prices and removing wrinkles from the brows of wheat farmers.

The grain operator said Canada had done remarkably well in the last three years in exporting wheat.

In the tariff barrier all over the world, bonuses to farmers and wheat boards, Canada had sold 1,600,000,000 bushels. It was impossible to estimate what this meant to the west, but it was at least a profit of \$100,000,000.

Recovery in Britain

Conditions Better Than In Any Other Civilized Country

Newcastle, Eng.—Chancellor Neville Chamberlain claimed in a speech here that the tide of recovery had set in more definitely in the United Kingdom than in any other great civilized country.

The chancellor pointed to figures showing unemployment is still falling and said for the first time in 10 years there has been an increase in the amount of labor employed on land. He said the greater part of returning prosperity was due to growth of home trade and that the situation in industries depending on foreign markets was more difficult.

Following failure of last year's world economic conference, he said, it had become necessary to try new methods. He suggested two methods, direct negotiations of which full use was being made, and development of intra-imperial trade.

St. Lawrence Project

President Roosevelt Assured That Every Effort Is Being Made To Assist Plan

Washington.—Frank P. Walsh, New York State Power authority chairman, assured President Roosevelt that every effort would be made to go ahead with the power programme on the St. Lawrence project and he promised to continue co-operation for eventual development of the St. Lawrence seaway.

In a memorandum to the president, Walsh said: "It should be possible to reach a complete agreement among the several government agencies involved well within the current year."

"An annual saving in the northeast of more than \$200,000,000 in lower electric rates, resulting from completion of the St. Lawrence project, is indicated by detailed figures which will shortly be presented to the New York legislature."

Kivawis Convention

Lethbridge.—D. H. Elton, K.C., governor of the Western Canada district, Kivawis International, announced that the annual district convention will be held August 5-7. The convention will be held here.

W. N. U. 2039

Could Render Good Service

Senate Well Fitted To Carry On Inquiries States Buchanan

Ottawa.—The senate could render good service by carrying on inquiries. Senator W. A. Buchanan told the house in continuing the debate on the suggestion that more legislation be initiated there. Inquiries should be held into unemployment and immigration. No legislative body in Canada had the experience of the senate and was, therefore, fitted for such work.

Senator Buchanan described the contribution the senate had made to the pockets of the farmers of Western Canada by safeguarding rates on flour and wheat in the "Crow's Nest Pass" agreement. A frequent critic of the senate was that it was made up of reactionaries. If these were true the senate would have taken the part of the railways in 1919, but did not and saved the preferential rates for western farmers.

When the Klondike railway proposal was rejected by the senate, the late Sir Clifford Sloane had said he would not test public opinion on any measure rejected by the senate.

Return To China

Aged Chinaman, Hit By Depression, Return To Canton

Chinatown, China.—Thousands of aged Chinese arriving at Canton from North America and other foreign ports are being given free transportation to their native villages "so they may die at their old homes," according to a statement from the Overseas Chinese Relief Bureau.

The latest official figures gave more than 13,000,000 Chinese living abroad, but within the last year thousands of them have returned to Canton because the world-wide depression robbed them of their jobs or cost them the loss of a lifetime of savings. Most of the returned emigrants have been away from 40 to 50 years and are penniless.

Budget Surplus

Britain Expects Further Increase At End Of Fiscal Year

London.—Another increase in the current surplus was recorded, with the end of the fiscal year only 11 days away, bolstering the expectation of a budget surplus of around \$150,000,000.

Latest figures, those for last week, showed revenue exceeded expenditures \$34,000,000, bringing the current surplus to \$110,000,000, after fund and sinking fund payments, which were not provided for in the budget a year ago.

The current surplus of \$110,000,000 compares with a current deficit of \$200,000,000 at the end of a year ago.

Favors National Bank

Resolution Will Be Considered By B.C. Legislature

Victoria.—The British Columbia legislature will consider a resolution which would, if passed, place it on record as favoring a national banking system for the purpose of making national, provincial and municipal credit available for governmental expenditure.

The public accounts committee adopted a resolution to this effect. The matter was brought up by G. G. McGregor, K.C., (Lib., Vancouver-Burrard). Private financing would not be affected.

Has Faith In West

Toronto.—"I never had more faith in western and northern Canada, and I firmly believe that the future of Canada lies there," declared Rev. W. G. Brown, of Saskatoon, former moderator of the Presbyterian church, in an address on Western Canada at the general board of missions.

Favors Titles If Earned

Ottawa.—"I will always be a plodder myself, but I am in favor of titles for Canadians, if they are restricted to those who really earn them," E. W. Beatty, president of the Canadian Pacific Railway Company, observed in an interview here. Mr. Beatty made it plain, however, he is opposed to hereditary titles here.

May Cut Interest On Loans

Toronto.—The Globe said in a dispatch from its Ottawa correspondent that considerable progress was evident in the government proposal to obtain agreement from loan companies for reduction of interest rates on loans to farmers.

Conflagration In Japan

150,000 Persons Reported To Have Been Made Homeless

Tokyo.—At least 1,000 persons were known to have been killed in a fire which devoured three-fourths of the city of Hakodate, largest community in Japan north of Tokyo.

Twenty-five thousand buildings were destroyed, and 150,000 persons were made homeless, according to figures in a message received by the minister of communications from the Hakodate wireless station on the outskirts of the ruined city.

The fire raged an equinoctial gale which whipped it into a night-long fury. The city was still burning after the sun had risen, although the gale was reported abated.

Chimneys toppled by violent winds set fire to roofs, causing the general conflagration, reports said. Nearby suburbs also caught fire.

The Japanese army, navy and other government agencies were hastening to the scene to conduct relief work.

Electric plants were destroyed soon after the fire broke out and the city was thrown into darkness except for the lurid light of the flames.

One despatch said the city was a "living hell" and declared that "through the darkness the refugees were fleeing from death and were abandoning even the small bundles of possessions they carried from their homes."

STATE CONTROL OF RADIO STILL IN THE FUTURE

Ottawa.—Complete nationalization of radio broadcasting was still the distant future and taking over by the Canadian Radio Broadcasting Commission of the 60-odd privately-owned stations remained only a "pious hope," Hector Charlesworth, chairman of the commission, told the radio commission of the House of Commons.

In the meantime, so that those in isolated districts may not be deprived of good radio, new licenses for privately-owned stations have been granted.

Financial stringency had prevented full development of radio along the lines laid down by the legislation of 1932, Mr. Charlesworth said, but a vast improvement had been made and further development would result as revenues permitted.

To W. A. Beynon (Conservative, Moose Jaw), who asked if it were true that a Regina station had been ordered to spend \$16,000 to put the plant in order, or close up, Mr. Charlesworth said that was not quite the proper picture.

The station had been advised of certain improvements necessary and he expected the owners would be glad to make them.

Mr. Charlesworth corrected a statement he made on his last appearance respecting the readers of Canadian newspapers.

On that occasion, speaking of news broadcasts, Mr. Charlesworth was quoted as saying 80 per cent. of the people of Canada never saw a daily paper.

"Apparently that was what I said, but it was certainly not what I intended to say," Mr. Charlesworth declared. "What I meant was that 80 per cent. of the people did not see an afternoon paper until after the evening news broadcast."

Refugee From Vienna

Self-exiled from Austria, Max Winter, former vice-mayor of Vienna, one of the leaders of the Austrian Socialist Party, is pictured as he arrived at New York. Many Socialist leaders fled the country after the party was outlawed. Winter is the first to arrive on this continent.

Widen Liquor Act

For Free Sale Of Beer And Wine In Ontario

Toronto.—The Ontario government moved to provide for free sale of beer and wine in the province. In the dying moments of a dreary session the government surprised the legislature into frenzied applause with presentation of the long-waited and much-desired bill.

The measure provides:

1. Sale of beer and wine with meals in restaurants, in standard hotels and such other places, which would include restaurants and clubs, as the board may decide.

2. Sale of beer by the glass in refreshment rooms in standard hotels, and in Veterans' and labor union clubs.

3. Full control will be maintained by the liquor control board.

4. The board may dispense with the present permit system.

5. The board may permit advertising in newspapers and by radio.

6. The board may grant permits for the consumption of beer and wine at banquets.

Train Wreck In Russia

Thirty-Three Persons Are Reported Killed And Sixty-Eight Injured

Moscow.—Thirty-three persons were killed and 68 injured in the wreck of two trains near Sverdlovsk. The wreck occurred nine days ago, but word of it did not become public until recently.

Despatches said a local passenger train, travelling at high speed, ran through a closed semaphore at Tavatul, and collided with a freight train.

The responsible employees are already on trial.

This is the fourth such catastrophe reported within a month.

Code To Govern Industry

Kitchener, Ont.—A code to govern the furniture industry has been drawn up by more than 200 striking plant workers here, and will be forwarded to the mass buying pool established by the government.

It is to be expected that the code will be adopted by the government.

It was Hyatt, president of the Ontario legislature, J. E. Jamieson, Howard Fraleigh and John A. Craig, presenting facts and opinions gathered in connection with operations of the Toronto stockyards.

It was charged there was no competitive bidding on the stockyards and that 99 per cent. of Ontario farmers would favor Dominion operation of the yards.

Drovers, they said, were afraid to open up charges "for fear their heads will fall off."

Ontario farmers would favor changes in hog-growing regulations, the federal committee was asked, especially as to percentage separation of the ganders in the yard and open bidding. And farmers would also restrain packing plants from buying direct from producers and staying away from the stockyards until they saw what their requirements would be.

George H. Barr of Regina, repre-

senting the Saskatchewan livestock producers, was a brief witness. He said exchange fluctuations were the bane of western exporters, suggest-

ing stabilization by agreement of all

Empire currencies apart from gold

backing and other external factors.

If Canada could not secure Empire

co-operation, it could fall back on a stabilization fund of its own, reim-

bursing exporters for the adverse

years.

Bombing In Berlin

Explosion Wrecks Taxi Of Jewish Owner Of Motion Picture Theatre

Berlin.—A tin can filled with high explosives was hurled on the famous Unter Den Linden and wrecked a taxi containing David Oliver, Jewish owner of a motion picture theatre.

First reports which raced through Berlin said the bombing was an attempt to assassinate Hermann Wilhelm Goering, premier of Prussia and close associate of Chancellor Hitler, were denied. Evidence indicated it was a plot against the life of Oliver.

The automobile was wrecked, near the intersection of the avenue with the Wilhelmstrasse, and Oliver's chauffeur was seriously injured.

Members of the family of the theatre owner, a native of Austria but for 35 years a resident of Berlin, refused to discuss the affair. He was "at home," it was said.

It was at his theatre recently that anti-Jewish rioters in Berlin rioted in the naming of the film, "Catherine the Great," featuring Elizabeth Bergner, a Jewess.

Reports said Goering had been seen to drive past the corner shortly before the explosion lent color to the story that he was the intended victim, but these met a vigorous denial from police.

The premier, they said, was attending the ceremony opening a ship lock at Niederoftow at the time. Police offered 5,000 marks (about \$1,985) reward for information to clear up the mysterious explosion.

Russia May Join League

Report Necessary Action To Be Taken In September

Paris.—It was learned in usually reliable circles that Soviet Russia has about decided to enter the League of Nations and may take the lead in the negotiations.

It was said in diplomatic circles that soundings taken by Moscow leaders had convinced them that entry into the league would not only be welcome but that a seat on the board would be assured.

A final decision was said to be expected shortly since the necessary preliminary negotiations were likely to be complicated.

The Soviets must be officially recognized by such league members as Holland, Denmark, Finland and others with whom she has at present no diplomatic relations.

NATIONAL CATTLE MARKETING PLAN IS ADVOCATED

Ottawa.—A national cattle marketing scheme was urged before the Stevens committee of the House of Commons by a veteran rancher of the west, Roderick Macleay of High River, Alta. To save the cattle industry he suggested lowered freight rates on export shipments, encouragement of the United Kingdom market and, if necessary, government-imposed minimum prices for cattle.

It was Hyatt's day before the committee, three members of the Ontario legislature, J. E. Jamieson, Howard Fraleigh and John A. Craig, presenting facts and opinions gathered in connection with operations of the Toronto stockyards.

It was charged there was no competitive bidding on the stockyards and that 99 per cent. of Ontario farmers would favor Dominion operation of the yards.

Drovers, they said, were afraid to open up charges "for fear their heads will fall off."

Ontario farmers would favor changes in hog-growing regulations, the federal committee was asked, especially as to percentage separation of the ganders in the yard and open bidding. And farmers would also restrain packing plants from buying direct from producers and staying away from the stockyards until they saw what their requirements would be.

George H. Barr of Regina, representing the Saskatchewan livestock producers, was a brief witness. He said exchange fluctuations were the bane of western exporters, suggesting stabilization by agreement of all

Empire currencies apart from gold

backing and other external factors.

If Canada could not secure Empire

co-operation, it could fall back on a

stabilization fund of its own, reim-

bursing exporters for the adverse

years.

NOT NECESSARY TO GUARANTEE FURTHER LOANS

Ottawa.—The conditions this year will be such, the government expects, that it will not be necessary for the Dominion to guarantee any loan of a private company as was the case with the Canadian railway last year. Wesley Ordron, minister of labor, made this clear in the House of Commons.

Accordingly the part of the clause in the relief act of 1933 which gave the government authority to make such guarantees will be dropped in the relief act of 1934.

The relief act passed each year gives authority to the Dominion to join with the provinces in relieving unemployment and should not be confused with the forthcoming federal works program, which will be entirely a Dominion undertaking and will be brought into the house as separate legislation.

During the discussion opposition members pressed the minister to substantiate or deny published reports that the federal works scheme would run to \$51,000,000. The minister, however, was non-committal as to the amount the government proposed to spend.

The resolution was carried and the bill based on it given first reading.

A conference will be held with the provinces as to the spending of the money under the relief act after it has been passed, the minister explained.

The Dominion government had paid out for direct relief up to March 10 about \$13,000,000. Mr. Gordon stated.

With accounts yet to come in he estimated the total payment for the fiscal year covered by the relief act of 1933 would be somewhat below the limit included in that act of \$20,000,000.

For Livestock Commission

Proposal Is Made Before Mass Buying Investigation

Ottawa.—Establishment of a permanent commission of three members to be known as the "Canadian Livestock production and marketing commission" was proposed before the "Stevens" mass buying and price spreads committee of the house of commons. The commission would be for the purpose of improving and stabilizing the livestock industry.

Setting up of this body was advocated by I. Ingaldson, manager of the Canadian Livestock Co-operative (Western), Limited, and secretary-treasurer of the Manitoba Co-operative Livestock Producers, Limited.

Convening by the government within the next two months of a "Canadian Livestock conference" was another proposal thrown out by Mr. Ingaldson. This conference would meet every year. It would consist of one representative of the livestock producers' organization or organizations by each province, and two representatives of each of the following:

The Industrial and Development Council of Canada, Meat Packers, the Railway Companies' Joint Council, the Retail Merchants' Association and the Consumers' Association of Canada. The conference would confer with and make recommendations to the suggested permanent commission on matters appertaining to the livestock industry.

The services of one or more experts to act in an advisory capacity to the proposed permanent commission and to the Canadian livestock conference should be procured, the western livestock authority suggested.

Working Step Is Recovery

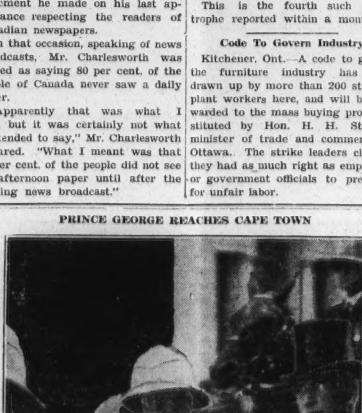

Experts Meet In London To Prepare For Conference

London.—Final details for new wheat recovery proposals, including a minimum price scheme, were being worked out in preparation for the international conference at Rome, April 5.

A private meeting of experts of eight nations opened here at Bush house.

Alternative plans are being drawn up, it was learned, for some of the schemes under consideration.

Hamilton, Ont.—"This country has fought economic depression with courage and fortitude, the next great development is recovery," said Prime Minister R. B. Bennett, addressing the Hamilton, Brantford and district branches of the Canadian Manufacturers' Association here.

Our picture shows Prince George driving from the docks at Cape Town with General Hertzog, Prime Minister, on the way to Government House. This was the first stage of the Prince's tour of South Africa.

Will Take Another Year

Great Reindeer Trek Held Back At Mackenzie River

Thwarted in an attempt to cross the mighty Mackenzie river, Canada's moving reindeer herd will have to spend another winter west of their destined permanent home. Word has been received by Hon. T. G. Murray, minister of the interior, of the difficulties encountered by the hardy band of reindeer herders, engaged in the years-long task of moving the animals from the western shores of Alaska to an area in the Northwest Territories where they will provide food and clothing for Canadian Eskimos.

Purchased from interests in Alaska some years ago, the herd was started on its long trek. Each summer the progress was interrupted for the breeding season and the animals were allowed to rest until the young calves grew strong enough to travel. The object this winter was the crossing of the Mackenzie river from the summering grounds south and east of Akavik, famed as the centre of the dramatic chase for the mad trapper, Ivan Johnson, two years ago, and as a stopping point in Col. Charles Lindbergh's flight to the Orient by way of Northern Canada.

The Mackenzie river is 70 miles wide and the herders planned to cross on ice. Little barren islands dot the wide sweep of the river, but afford no winter fodder for the animals. So it was planned to make the crossing in a rush, driving the reindeer night and day until the eastern shore was reached, where they would find food and rest.

Tais year, however, the Arctic rim of Canada was assailed by high winds and unusually severe blizzards. When Andrew Bahr, captain of the herders, edged his charges out over the ice, he found wide stretches of it swept bare of snow and as the reindeer could not travel on glacier ice, long detours from the planned route had to be made.

More ill-fortune in the form of a heavy blizzard after they had been out hours cut on the ice, and in the midst of it the deer stamped and began a dash back along their trail towards their summer grazing grounds near Shingle Point.

Bahr could only round up the stragglers and abandon the attempt to cross for this winter. Next year, when the river freezes over, another route, believed to be more feasible, will be mapped out and another attempt made to deliver the animals to their permanent range of 15,000 square miles on the east side of the Mackenzie delta.

Anticipating the arrival of the herd this year, a representative of the interior department had gone from Akavik to grazing ground to make preparations for receiving the herd and its drivers. When the animals did not arrive, he made inquiries and learned the cause of difficulty. He then notified the department.

A Valuable Industry

Canada's 1932 Fish Catch Had

Marketed Value Of \$25,957,000

The herring is the chief Canadian fish so far as quantity caught is concerned, leading all others in 1932 with 1,862,373 cwt., but it ranked only fourth in marketed value at \$4,210,000. Salmon led in value with 1,331,000 cwt. at \$8,957,694. Lobster with a comparatively low catch of 48,498 cwt. was second in value at \$4,745,311. Cod with a catch of \$1,429,941 cwt. was third in marketed value at \$2,193,621. The marketed value of the total catch of fish in Canada in 1932 was \$25,957,000 compared with \$30,571,000 in 1931 and \$47,904,000 in 1930. The sea fisheries accounted for \$21,763,000 of the 1932 total. — St. Thomas Times-Journal.

A Home-Made Trumpet

Out of a piece of a gas pipe, some plumbing brass, curtain rods and an old automobile horn, Herbert Allen, 17-year-old high school student of Seattle, made himself a trumpet. Herbert, who used another trumpet only for a short time, now is learning to play his. He said he ground the valves "just right" by "trying the pitch" on his violin, and then grinding the valves till they sound ed the same.

Weavers of Belgium are complaining against the dumping of Japanese goods into the country.

Earth has no joy like that of a fat woman who has just found a decent-looking frock that is big enough.

TWO PARADES VASTLY DIFFERENT IN CHARACTER BUT STILL MILITARISTIC

These two photographs, one from London, the other from Berlin, reached Canada in the same mail. They are very interesting in view of the strenuous efforts now being made by the League of Nations Society to bring about world disarmament. Top, new recruits for the Elton O.T.C., Elton College, Windsor, England, with their rifles on their shoulders, arrive for the first parade. Below, German troops haven't forgotten the goose-step as they stride past the National Memorial in Berlin in honor of the German war dead on National Heroes Memorial Day.

Hal Variety Of Horns

14ERIm2B0ff Eh 5-2n5 and h Prehistoric Animals Which Roamed

West Grindstone Monsters

According to the records of the reptiles, horned dinosaurs were the most bizarre of all the ceratopians genera—romped and gambled over the present site of Lethbridge, Alberta. And, according to Dr. Richard S. Lull, director of Peabody Museum of Natural History at Yale University, there were as many as 37 different varieties.

With the exception of a single species discovered in Western Asia, remains of these pugnacious creatures have been found only in North America. Belly River Valley in Alberta was a particular stamping ground of the dinosaur.

The ceratopians and all other plant-eating dinosaurs were grotesque monsters compared with specimens of the same type found in other areas, Dr. Lull claims.

Aside from the stamping and gamboling over the foothills, the dinosaurs also spent a little of their time in family quarrels, judging from their warlike equipment. The Belly River specimens had distinction all their own, such as the helmeted diners with the extreme backward extension of the skull.

The spine and skull have run riot in the styracosaurus specimens of Belly River. Not content with a well-developed nose, horn and neck mantle, this dinosaur grew eight long horns extending from the rear of the mantle. There is another horn growing out of the nose.

The centrosaurus developed its own peculiarities. It had a long nasal horn and short brow horns, a short deep muzzle, a saddle-shaped crest with two pairs of processes rising from the rear, an interior grooved pair of horns projecting forward and overhanging in the crest and a posterior curved hook-like pair.

Shoots Arctic Owl

New Brunswick Student Gets Bird With Huge Wing Spread

Flying down from the north in search of food, a huge Arctic owl with a wing spread of five feet fell prey to a 22 rifle in the hands of a high school student at Saint John, New Brunswick. Verdun Wilcox was on the mud flats of Courtney Bay when he brought down the big bird. He had been using the job by using his rifle as a club.

Arctic owls go far south only in exceptionally severe winters when the northern menu of rabbit is hard to get.

"Fingerprinting" Voices

A method of fingerprinting voices to show the roguish a singer is best fitted for war demagogues, according to the National Opera Club in New York by Dr. William Braid White of Chicago. These vocal fingerprints, it appears, like the police files, identify broad character tendencies. There are some voices most fitting for villainous roles others for uplift parts.

Coffee is a native plant of Abyssinia.

The Wheat Quota

Export Quota For Coming Crop Year Explained By Premier

Canada's wheat export quota for the 1934-35 crop year under the world wheat agreement as explained by Premier Bennett in the House of Commons, is expected to work out at slightly less than 270,000,000 bushels. The figure is arrived at by taking 26,400,000 acres as the average acreage sown to wheat in the three years 1931-32-33, and 17.31 as the average yield per acre annually for the 10 years ended with 1933.

From the total yield under those figures 15 per cent is subtracted as indicative of the reduction undertaken whether by acreage sown or restricted selling for export, and from the remainder 117,000,000 is subtracted as representing the normal domestic requirements.

The quota for the 1933-34 crop year was 200,000,000 bushels. The exports for the crop year 1932-33 was 264,000,000 bushels with no quota in force.

Famous War Vessel Sold

British Scaphine Carrier Now Serving In Scaphine Carrier Islands

The Engadine, the first seaplane carrier in any navy to take part in a fleet action (at Jutland), which has been in the service of the Southern Railway transporting passengers across the English Channel, has been sold to the Compania Maritima of Manila, Philippine Islands, and she is to be used as a service between two islands, 350 miles apart.

Taken for service with the Royal Navy in the early part of the war, the Engadine was attached to the Battle Cruiser Fleet, and at Rosyth, in 1916, a seaplane got off the vessel in four minutes.—London Daily Mail.

Lady—“Come back here, boy! That ice isn't safe.”

Boy on Bank—“That ain't fair, missus; I bet him five cents he'd fall in.”

MacLeod's First Hotel

Inn At Alberta Town Consisted Of One Room

The first hotel established in Macleod, Alta., was humorously described in an interview at Calgary with Archdeacon J. W. Timms, first Anglican missionary to the Blackfoot Indians and preacher of the first sermon delivered in Calgary. Archdeacon Timms stayed at the hospitry on his way to the mission field in the spring of 1883.

The hotel consisted of one long room, which served as both bedroom and dining room as well as wash room, and was kept by a well-known character called “Auntie,” dark-skinned but of beaming countenance, who claimed to be the first “white woman” in the west.

Guests provided their own blankets and slept on the floor. The kitchen, which served also as “Auntie’s” bedroom, was a lean-to at the back. At 6 a.m. “Auntie” walked the length of the room with a broom, with which she awakened every sleeper, who was expected to be up and have his blankets rolled before she reached him again as she swept the floor before breakfast, which was served at a long table reaching down the centre of the room.

No More Waste Steam

All C.P.R. Engines Are Having Whistles Better Equipped

Locomotives of the Canadian Pacific Railway will no longer show “the white feather,” due to the repair program recently put in force. The waste of steam escaping from the top of many engines is called by that name by railroad men. A thing of beauty to the public, it is considered a waste by the operators, who fix the steam traps on the engines to prevent the escape of the whistles. Now the efficiency engineers are having the old type of seats replaced by metal ones so that there will be no more waste of steam between tools.

Prevention Only Treatment

Doctor Claims There Is No Known Cure For Colds

On the subject of colds, that most frequent of afflictions and reaching its greatest prevalence at this season of the year, Dr. Alan Brown has some interesting but not too cheerful information and comment in a recent issue of “Health.”

Dr. Brown states frankly and bluntly that there has never been and is not now any cure for colds. They can be treated only by prevention. The general consensus of opinion is that the common cold is a virus disease spread through contact with individuals. It is not due to the opening of windows. He pours scorn indeed on the idea of draughts and asserts that these do not cause colds any more than cold feet or wet clothes. “Their only role may consist of a lowering of the resistance or depression of the circulation, which in turn lowers the resistance of the individual which thereby makes him more susceptible if he is exposed to an infected individual.”

“So much for some old and popular ideas.

“Since colds then are due to infection transferred from one person to another, what are we to do about them? Prevention, says Dr. Brown, should be the first consideration. All individuals infected should avoid contact with infants or children, who are more susceptible than adults and with whom the complications are more severe. Once infected an individual should remain in bed until he is symptom-free—this applying especially to children as it is economically possible for them to do so. By this procedure the spread of infection in home and schools is prevented. Emphasizing the need of such methods, Dr. Brown asserts that the public generally are firmly convinced of the contagiousness of scarlet fever, diphtheria, etc., yet these diseases are preventable to-day and are not so common or infectious as colds.

Fighting The Inevitable

People Have Always Fought Change In Transportation Method

We of the twentieth century find it difficult to understand people in generations past have bumped their heads fighting what was inevitable. That they opposed railroads because trains replaced stagecoaches is still remembered, but it is not so well known that back in the seventeenth century they fought stagecoaches. One Englishman of the period mourned in this key:

“These coaches and caravans are one of the greatest mischiefs that have happened to the kingdom. They prevent the breed of good horses and destroy those that are bred. They emphasize His Majesty's subjects, who, having used themselves to travel in coaches, will possess no skill in horsemanship and become incapable of serving their country on horseback in time of war.”

Guests provided their own blankets and slept on the floor. The kitchen, which served also as “Auntie’s” bedroom, was a lean-to at the back. At 6 a.m. “Auntie” walked the length of the room with a broom, with which she awakened every sleeper, who was expected to be up and have his blankets rolled before she reached him again as she swept the floor before breakfast, which was served at a long table reaching down the centre of the room.

No More Waste Steam

All C.P.R. Engines Are Having Whistles Better Equipped

Locomotives of the Canadian Pacific Railway will no longer show “the white feather,” due to the repair program recently put in force. The waste of steam escaping from the top of many engines is called by that name by railroad men. A thing of beauty to the public, it is considered a waste by the operators, who fix the steam traps on the engines to prevent the escape of the whistles. Now the efficiency engineers are having the old type of seats replaced by metal ones so that there will be no more waste of steam between tools.

Calf In Cottage

Grew So Large Doorway Was Too Narrow For Animal To Escape Once Upon a Time . . .

A family in the Hampshire country of England adopted a calf as a pet, and took it to live, just like one of themselves, in their cottage. The calf grew. One day the family realized that it was too big to get out through the doorway. They adjusted the situation calmly until the pet had to be slaughtered on the spot to get it out of the cottage.

Forgot The Machine

Relief workers at Helens, Wisconsin, jacked up a school house, excavated for a foundation. They moved a concrete mixer into the excavation, mixed cement, laid the foundation, removed the jacks, dropped the house on its new base. Then they made a discovery. They had neglected to remove the mixer. It was completely bottled up. School children admired it as they returned to classes.

Cotton and linen textiles do not usually shrink after the third laundering, and most shrinkage occurs in the first washing.

Professor—What is steam? Student—Water in a high state of perspiration.

The Days Of Real Romance

Reminiscences Of Early Voyages From Canada To West Indies

Although this is a busy season for the port of Saint John, the number of craft arriving and sailing seems comparatively small to Miss Stella Payson, who recalls days when “wooden ships lay four deep at the wharves and the harbor front of Saint John was a forest of masts.”

A contrast between shipping of the past and present was drawn in a paper Miss Payson read before the New Brunswick branch of the Canadian Women's Press club. Relating reminiscences of a voyage from Saint John to the West Indies more than 60 years ago, when she was a small child, Miss Payson instanced the difference between a West Indian trip then and one to-day.

“In the old days we went aboard with the knowledge that it would be many days, or even weeks, if winds were favorable before we again trod dry land,” she said.

“These were the days of real romance, when the little ships could poke their way into small far harbors, through coral reefs and up into mangrove-guarded river mouths, touching the secluded places which the big ships can never reach.

“I have in mind now an inlet on a tropical island where our little ship lay for a week, a sandy reef to seaward, through an opening we had passed, and a low shore, all dismal mangrove growth. There were two ways of getting inland. One meant rowing up a small stream after passing the mangroves. At the other spot, at which it was possible to land there was a road with one building of wood, a so-called ‘store’, and a cluster of huts like bee-hives, the homes of the natives.”

In her account of a child's reminiscences, Miss Payson told of the southern trip in her father's brig, the *Ceres* Payson. It left Saint John with a load of lumber, piled high over the decks and shutting out light from the cabin.

Even in rough weather, although the load was higher than the rail, the men ran back and forth on ship as if a wall rose between them and “the unfathomable depths below,” said Miss Payson. One of the crew was washed overboard at night during stormy weather.

Delayed by hard going, the brig was still far from land on Christmas but Santa Claus visited the child nevertheless. Among her gifts was a pair of slippers from the cook, “who was a shoemaker by trade. Any one who couldn't get a job, or who wanted to get to some other country in those days could always ship as a cook. He didn't need to have any previous knowledge of cooking.”

After a long stormy trip the brig reached its island destination, substituted the cargo of lumber for one of sugar, and returned safely to her home port.

Canadian-Made Skates

Large Increase In Export To Europe Since 1931

The traditional skates of many European countries are apparently giving way before the Canadian brand, for in the last two years there has been a large increase in the export from Canada. In 1931 Canada sent only 6,001 pairs of skates to Europe, but in 1933 the export was 24,418 pairs. Germany last year was the heaviest purchaser with 7,259 pairs. Poland coming next with 4,511 pairs. Czechoslovakia with 3,218 pairs and France 3,009. A small country like Switzerland got 2,600 pairs last year.

Space For Canadian Lumber

The Port of London Authority announced that almost \$60,000 would be allotted for the erection of new timber storage sheds, necessitated partly by increased imports of Canadian lumber from the Ottawa Economic Conference agreements. The sheds will be erected at the Surrey commercial docks, and will provide additional storage space for 22,250 tons of timber giving the docks total timber storage capacity of 461,050 tons.

Goldfish For England

Everything is gold these days, even the fish. More than 1,000 goldfish, all sizes, species and probably remnants left Halifax on the liner *Tamia* for Enfield, England. Percy V. Fox, chief butcher, was appointed special nurse for the trip.

The first indoor bathing pool and shower in the United States was installed in Philadelphia in 1850.

THE CHRONICLE, CROSSFIELD, ALBERTA

Nasadyk - High

A quiet wedding took place at the home of Mr. and Mrs. George Nasadyk on Monday, March 26th when their only daughter, Pauline was united in marriage to Clayton J. High, son of Mr. and Mrs. E. D. High. The Rev. C. J. Hollman of Didsbury, officiated.

The bride entered the room on her father's arm to the strains of a friendly Premier and a kindly-disposed Government; they conquered a rather contrite Pension Board. They understand the Pension Board now, and the Pension Board understands them better. There were few big troubles after all; it was those miserable little picayune transactions which exasperated the veterans. Armistice appears to have been declared and sniping has ceased. In any case the pension problem appears to have been successfully kept out of the political arena. For this surely, all right thinking citizens must be heartily thankful. At noon on Wednesday all delegates were the guests of the Prime Minister at luncheon at the Chateau Laurier, and on Thursday at noon, 30 Alberta delegates were the guests of Messrs. Bury, Stewart, Davies and Stanley, at the parliamentary restaurant.

The groom was attended by his brother Mr. Alfred S. High. The bride was attended by Bernice Gordon of Calgary, dressed in pale blue satin and carrying a bouquet of pink carnations.

The ceremony took place at 12 o'clock, after which dinner was served for the forty guests. Mrs. R. Green, Mrs. J. R. McTavish, Miss Veva Green and the Misses McTavish assisted in serving.

An Honest Man.

E. Mason found a purse containing \$21.00 in cash in a field on his farm on Friday. Mr. Mason turned the pocketbook and contents over to Constable Cameron, and through a postal receipt found in the pocketbook and issued at Red Deer, it was found to have been issued to a service station operator at Penhold who was held up on January 28th and was therefore part of the loot taken by the four bandits who were captured east of Crossfield by Constable Fenn and a posse of citizens.

The members of the Mission Band entertained their mothers at the manse on Tuesday afternoon.

Rev. and Mrs. Longmire were guests of Rev. and Mrs. C. Rogers of Carstairs Monday afternoon. In the evening Mr. Longmire gave a Lenten address in the United Church.

Legion Convention at Ottawa

(From Hennard)

The delegates to the Convention of the Canadian Legion have come and gone. They came; they saw; they conquered. They came to a very hospitable city and a sympathetic parliament; they saw a friendly Premier and a kindly-disposed Government; they conquered a rather contrite Pension Board.

The bride entered the room on her father's arm to the strains of a friendly Premier and a kindly-disposed Government; they conquered a rather contrite Pension Board. They understand the Pension Board now, and the Pension Board understands them better. There were few big troubles after all; it was those miserable little picayune transactions which exasperated the veterans. Armistice appears to have been declared and sniping has ceased. In any case the pension problem appears to have been successfully kept out of the political arena. For this surely, all right thinking citizens must be heartily thankful. At noon on Wednesday all delegates were the guests of the Prime Minister at luncheon at the Chateau Laurier, and on Thursday at noon, 30 Alberta delegates were the guests of Messrs. Bury, Stewart, Davies and Stanley, at the parliamentary restaurant.
